

Ajit Pai, Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Chairman. Pai:

On behalf of the employees, clients, and partners working with us at Heroic Media Group, we ask that you please protect the Open Internet rules as they stand today. You are all that prevents larger monopoly powers from stifling a small business like ours.

If you beleive, as you stated before your appointment to the Chairmanship, the current conditions have allowed industry titans like IBM, Microsoft and others to thrive, it stands to reason what we have is not broken. Companies such as AT&T and Verizon must rely on R&D as they did once and not more price gouging tactics as they are attempting to do via the FCC rules change.

Already they stand in violation of the rule. Hold them accountable. Please do not ask us to further supplement their practices. A strong economy relies on the agility and perseverance of small business like ours. We prefer to focus on beating our market competition, not having to defend ourselves from the FCC taking sides.

COMMON CARRIER! Enough is quite enough, thank you.

Sincerely,

Kerri Barber
